

I take in teens from very troubled backgrounds by having level 2 or 3 foster care girls come live in my home. I have had over 35 kids live in my home over the years. They come in participating in drugs, alcohol, sex, and crime. It is a challenge to help them when most of the time they don't think they need help. One of the first things I do is confiscate all their music full of swearing, death, violence etc. We play K-love constantly in my home and the girls after usually only 1 week start singing music that is edifying to their spirit and souls. It makes these girls have a joy in their lives they have never known. Please do not change our broadcast service to LPFM. I am in the people business and also work with x-addicts and people that have needed much help and they all listen to K-Love because it encourages them 24 hours a day. WE all need that. There is so much anger and hostility and darkness in this world and this radio station is constantly bringing joy and love and encouragement in an otherwise bleak place. Grand Junction is a community of around 200,000 people and in businesses and even Wal-mart plays K-love - it makes a difference in the attitudes of employees as well as family and friends. Please do not change our broadcast service to LPFM. WE Need K-Love here. Thank you.

Sincerely,

Connie Galloway
